As a 23 year resident of Bonner County, I never cease to appreciate Idaho's thriving wildlife, vivid seasons, and most of all its independent-minded and freedom loving people. That community of people is important to me, and it is why I've served as a Planning and Zoning Administrator for the City of Priest River, Chief Judge for Bonner County elections, a member of the Priest River Airport Advisory Board, and a docent for the Bird Aviation and Invention Center Museum. Along with this my wife Michelle and I are active members of the Priest Lake Search and Rescue, boosters for the Priest River Regatta, and members of Bonner County Republican Women, Inc.

My working career began after High School when I enlisted in the Air National Guard as a jet aircraft mechanic. I graduated from Chaffey College and continued studying engineering at California Polytechnic University and was selected for pilot training in 1971. I maintained continuous combat readiness in the unit assigned aircraft while working full-time in the private sector and after 20 years I retired as a Major.

Shortly after starting work in the industry as an Industrial Engineer, I was promoted into supervision and achieved high-level management positions in engineering, production, manufacturing, and test. With experience in aerospace, transportation, manufacturing, government, military and construction sectors, I retired as a plant manager in 2007.

Throughout my 32-year private sector career I gained a unique and broad understanding of corporate and entrepreneurial needs. I know what businesses need to succeed and how to bring good-paying jobs to our area. I understand how onerous regulations not only discourage business expansion but also dissuade the entrepreneurial spirit.

My top priorities for District 1 are:

- Build a better economy with better jobs
- Eliminate burdensome fees and regulations.
- Reduce overall tax burdens

As a conservative, constitutional Republican, please join me in preserving what's best in Idaho while moving ahead for change that will restore hope and prosperity for the next generation.
