16 APR 22 AM 7:49  
SECRETARY OF STATE  
STATE OF IDAHO

Age:37 Hometown: New Kensington, PA Occupation: Software

I originally studied Math Education at the University of Pittsburgh, but found standard education to not be engaging enough. To better understand the world, other people and myself; I have done many different jobs and experienced many things since. Currently, I work for a mortgage software company and run my own business. My business, Anime Oasis, is an annual event for more than 2500 people. My work on it includes negotiating contracts on a variety of levels, leading my staff and the community in general, and making decisions at the highest levels.

I'm a firm believer in strong, concise action. I always study the facts in detail and make a decision that I can believe in without ever having regret. I strongly stand for efficient, intelligent government that reduces waste and corruption while directing money and resources to the most important issues facing Idahoans. I feel I represent the ideals of Idahoans when I say I want Idahoans to be able to earn a fair wage for their hard work, that I want our children to be well educated and prepared for the future, that we are each our own person and we should respect each other for it, and that the beautiful nature in our state should be protected from destruction.
